

DATASHEET

TPM2860 RF Schottky Detection Diode

Description

- DNmicron's TPM2860 series have good RF application performance
- Used as DC bias detector diode
- The series of detection diodes could be packaged in a variety of formats, we assure that when two or more diodes are mounted into a single surface mount package, they are taken from adjacent sites on the wafer, assuring the highest possible degree of match

Features

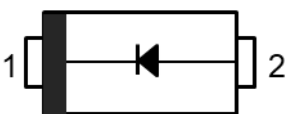

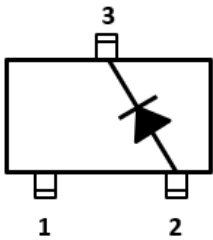

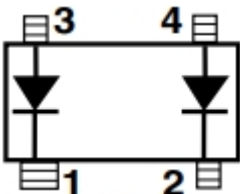

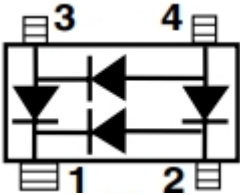

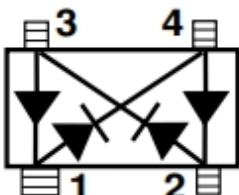

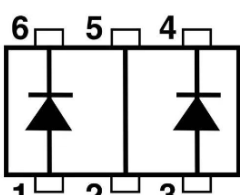

- Multi packages SOD-523, SOT-23, SOT-143
- High detection sensitivity
- Tape and Reel Options Available
- Pb-free (RoHS compliant) package
- High matching of dual diode in package
- Better thermal conductivity for high power dissipation

ESD WARNING:

Handling Precautions Should Be Taken To Avoid Static Discharge.
